

**BHF Centre of Regenerative Medicine – Annual Oxbridge Meeting
Kohn Centre, The Royal Society, Carlton House Terrace, London
Friday 27th September 2019**

10.00 Arrival, Registration, Coffee

10.20 Paul Riley

Update on the Oxbridge BHF CRM2

10.30 Shoumo Bhattacharya (Oxford)

2-warhead evasins targeting chemokine expression in myocardial infarction

10.50 Kim Mace (Manchester)

Mechanisms underlying chronic inflammation in response to injury

11.30 Rebecca Ryan (Bristol)

Exploring new roles for Osteopontin in zebrafish cardiac regeneration

11.50 Ludovic Vallier (Cambridge)

Using single cell transcriptomics to study liver development and to improve differentiation of pluripotent stem cells

12.30 Lunch

13.40 Vignesh Murugesan (Oxford)

Potential role of endocardium as a source for neovascularization of the ischemic heart

14.00 Maria Colzani (Cambridge)

Next-generation cardiac patches

14.20 David Greaves (Oxford)

New tools to study macrophage biology in inflammation and repair

15.00 Tea

15.45 Molly Stevens (Imperial)

Bioengineering strategies for cardiovascular applications

16.30 Paul Riley
